

## PLASTIC PROFILES

### PRODUCT DESCRIPTION

UPC plastic profiles are engineered to your precise specifications with our custom compounding and full in-house design capabilities. We offer extrusion and dual extrusion, in interior and exterior grade compounds. We also offer in-line and/or secondary operations, including minor assembly, welding and punching.

### IDEAL APPLICATIONS

- Storm and prime windows
- Entry and storm doors
- Garage doors
- Automotive and OEM markets
- Point-of-purchase displays
- Marine and boating industry
- Furniture industry
- Industrial/commercial products
- Conveyor belt cleats
- Gaskets
- Outdoor and recreational products (awnings and welting)

### CAPABILITIES

#### Flexible Extrusion

- 2 lines from 4½" to 6" extruders
- Solid and hollow shapes available
- Cut to size, coil or wind
- Wire and tubing
- Custom compounding
- Color matching
- In-house die design capabilities
- Capable of processing PVC, TPO, TPE
- Capable of complex shapes and projects
- Capability to source and utilize reprocessed materials
- Ability to hold inventory (safety stock) to assure JIT deliveries

#### Rigid Extrusion

- 1 line with a 3½" extruder
- Solid, hollow, rigid/flexible coextrusion
- Color matching
- In-house die design capabilities
- Capable of processing PVC
- Capable of complex shapes and projects
- Capability to source and utilize reprocessed materials
- Ability to hold inventory (safety stock) to assure JIT deliveries
- In-line and/or secondary finishing operations available
